

Welcome from the Conference Chairman

On behalf of the 2013 ASID Conference Organizing Committee, it is my great honor to welcome you all to the wonderful city of Shanghai. This year, the Conference is organized by the IEEE Taipei Section AP Chapter, Xiamen University and Xiamen Institute of Electronics (XMIE) .

This conference is the 7th one of the series of International Conference on Anti-counterfeiting, Security, and Identification (ASID). Within the seven years of time, the ASID conference has evolved into a unique forum for researchers from academia and industry to exchange innovative ideas and share their findings in the frontiers of diverse areas on information science. There were overwhelming responses to this conference and more than hundred papers submitted from 5 countries or regions over the world. At last, about 50 papers were accepted to be presented at the two-day conference and listed in the proceedings. All these papers are grouped into the sessions as: Cloud Computing & Information Security, Internet of Things (IoT) Technology & Networking Engineering, IC Design & System Integration, Pattern Recognition and Applications.

It is our great pleasure to invited Prof. Hsi-Tseng Chou, the chair of IEEE AP-S Taipei Chapter as well as the Professor of Department of Communication Engineering in Yuan Ze University, to be our keynote speaker. His speech title is “New Antenna Application Scenario: Near-Field Focused Antennas”. And, Prof. Tie Li, who is the professor in State Key Laboratory of Transducer Technology at Shanghai Institute of Microsystem and Information Technology, will present keynote speech on” Nano Fabrication, Nano Effects and Nano Sensors with MEMS technology”.

Shanghai is a renowned international metropolis drawing more and more attention from all over the world. Situated on the estuary of Yangtze River, it serves as the most influential economic, financial, international trade, cultural, science and technology center in East China. Also it is a popular destination for visitors to sense the pulsating development of the country. In addition to its modernization, Western customs and Chinese traditions intertwined and formed Shanghai's culture, making a visitor's stay truly memorable.

Wish you will benefit from the technical programs and have an enjoyable stay in Shanghai.

Donghui Guo

Conference Chairman
